Geo-Frontiers 2005 + ASTM D-35

Environmental Protection, Inc. will be attending Geo-Frontiers

2005 next week in full force! The meetings, to be held in Austin, Texas are actually three conferences in one:

Geo-Institute 2005 Congress
Geosynthetics 2005
GRI-18

EPI will also be exhibiting at the Geo-Frontiers trade show. All of these activities are in cooperation with the International Geosynthetics Society (IGS) and the International Society of Soil Mechanics and Geotechnical Engineering (ISSMGE).

Attending from EPI will be Dan Rohe, President of EPI; Mark Wolschon, Quality Control Manager at EPI; Brad DeArment, EPI Installation Superintendent; and Fred Rohe, retired senior observer... ☺

Immediately following Geo-Frontiers, Dan Rohe and Mark Wolschon will travel to Atlanta, GA to participate in two days of ASTM D-35 geosynthetic committee meetings. Dan and Mark have been the driving forces behind the development of two new ASTM standards for PVC geomembrane material and air channel testing of PVC field welds.

On January 20th Fred Rohe will be conducting a Constructing with PVC Geomembranes training seminar at the new Price and Company offices in Wixom, MI. Price and Company is Michigan's leader in providing erosion control products and solutions. If your organization is looking for PVC technical information or training, information on geosynthetics or liners, or just a program for your sales people or local club, please contact us. We are always looking for new audiences for our presentations.

Exhibit Dates/Times

Jan 24 6:30-8:30pm
Jan 25 Noon-5:30pm
Jan 26 10:00am-1:30
