EPI~WHITE - PVC Geomembranes

Environmental Protection, Inc. introduces **EPI~WHITE**... A PVC geomembrane engineered for specialized applications. EPI~WHITE meets all the stringent requirements of the *PGI-1103* material specification as well as providing you with all the advantages of a reflective white membrane. Engineered for buried applications, EPI~WHITE reduces heat build

expansion, combined with the homogeneous white color, virtually eliminates thermally induced waves or wrinkles. White PVC has proven its value in the roofing industry for many years and now you can have the same durability and advantages of a white surface on your PVC geomembrane exclusively from EPI.

Permaflex Tunnel Liner,

a black PVC liner with one side white is also now available from EPI. This material (shown at the left) is available in 60 and 80 mil thickness and is engineered for tunnel lining applications and for critical projects where easy detection of any damage to the membrane surface is necessary. This special two color PVC liner material is available in widths of 1.5 M (5 feet). EPI can also provide fabrication for very specialized applications.

~ ~ ~

EPI also carries white food grade PVC for applications such as pickle brining or cherry brining. For more information on all of our products, visit our award winning website www.geomembrane.com or call us toll free from anywhere in the USA at 800-OK-LINER.

up under the liner and reduces clay subgrade desiccation prior to covering the liner. PVC's super low coefficient of thermal
